

FCPF Program announcement

Date: December 15th, 2023

Issue: Addressing potential reversals from Mozambique's ER Program

On November 30th, 2023, the government of Mozambique submitted to the FMT for completeness check the third Monitoring Report for the FCPF ER Program Zambézia Integrated Landscape Management Program (ZILMP), covering the period from 2021 to 2022. As part of that report, the ER Program reported a negative performance of 7,464,200 tCO₂e above the Reference Level.

Following the provisions of the latest version of the Buffer Guidelines, the FMT will proceed to engage a Validation Verification Body to conduct a third-party verification of the reported results as per the Validation and Verification Guidelines.

Once the VVB confirms the reported performance by Mozambique, the FMT will proceed to cancel the necessary ERs from the Buffers in accordance with the latest version of the Buffer Guidelines available at the time of the completion of the Verification.
