- Approval of 15 grants in FY13 alone shows rapid up-scaling.
- CSO grants have increased steadily (7 in FY13)
- Supported activities have evolved from awareness-raising workshops/training manuals to more “technical” capacity-building

# Telapak: Indigenous Peoples Database

Indonesian NGO consortium **Telapak** developed web database of indigenous and customary forest territories as an input to REDD+ Readiness. Particularly important in light of the recent Supreme Court decision on customary forest tenure.

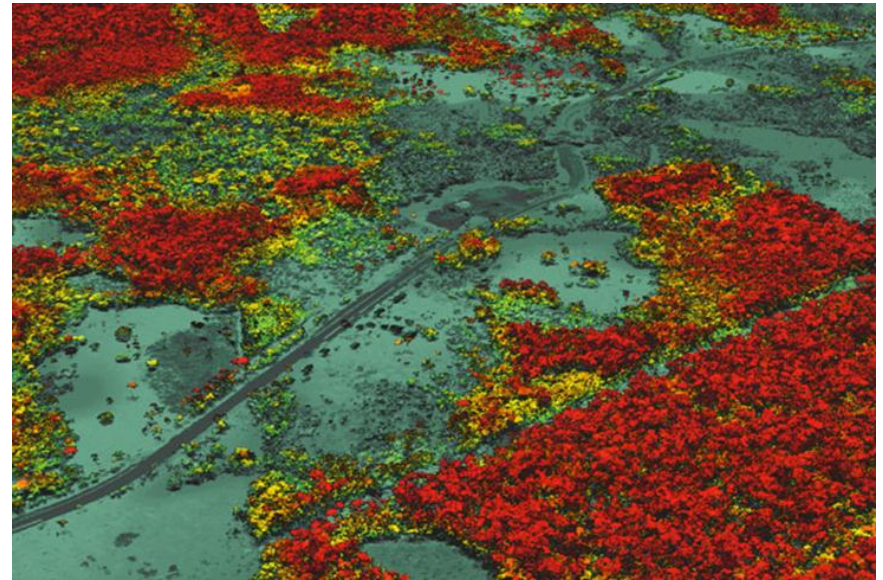

# PACJA: Preparing for REDD+

Regional project in East Africa, managed by the **Pan African Climate Justice Alliance**, focuses on developing capacities for meaningful participation in REDD+ environmental and social safeguards reviews and the development of grievance redress mechanisms.

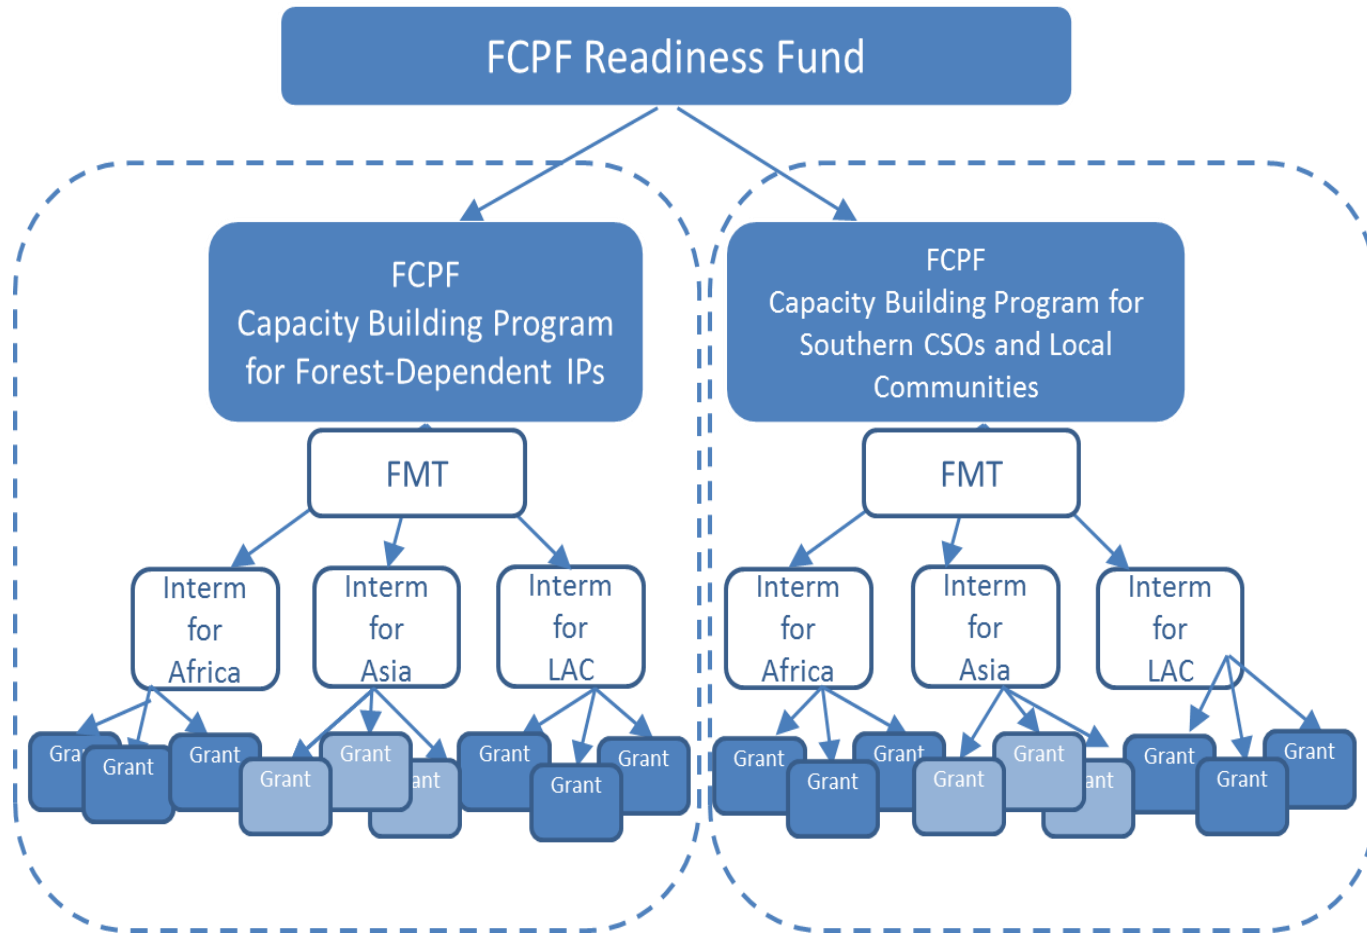

# OJEW: Mapping Carbon Resources

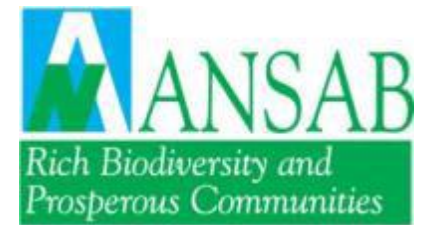

This recent project, implemented by the **Organización de Jóvenes Embera Wounaan de Panamá**, combines local knowledge and modern imaging technologies (LiDAR) to enhance capacities for participatory carbon monitoring in indigenous territories.
