PERU'S PROPOSAL FOR AN EMISSION REDUCTIONS PROGRAM IN SAN MARTÍN AND UCAYALI

Clarifications

Berioska Quispe Estrada

Ministry of Environment of Perú

July, 2019

EL PERÚ PRIMERO

TAP's final assessment:

- 52 indicators met
- 11 indicators not met → 10 major non-conformities
- 15 indicators not applicable at this time

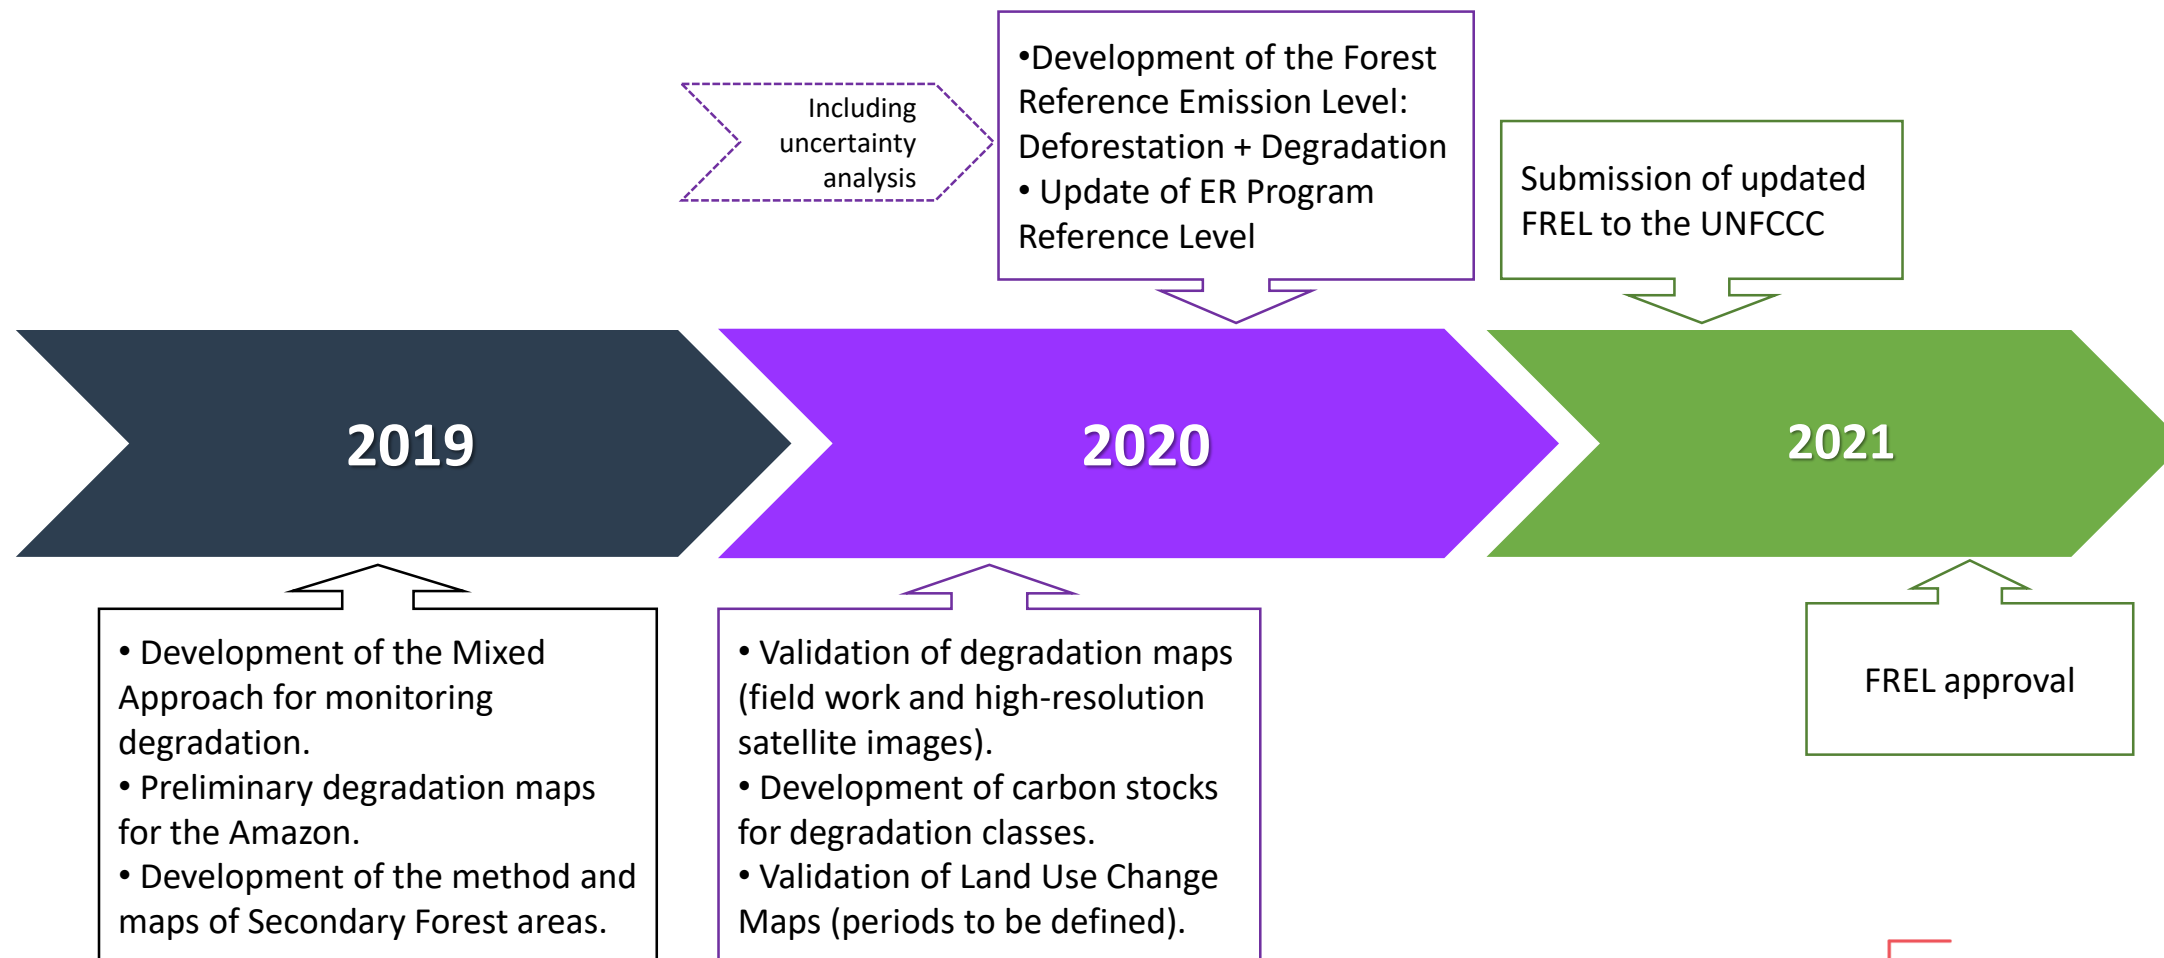

In addition, 57 comments received by FCPF participants in May 2019

→ Country's response sent in the *Matrix of Comments and Team Responses* document, on June 4th.

Final comments received in July 2019.

Carbon Accounting (Ind. 5.1 & Ind. 8.2)

A set of improvements will be developed for the RL and FREL:

Relevant actors engaged in constructing the nesting scheme:

MINAM, SERNANP, SERFOR, REDD+ Initiatives. Other actors to be involved this year to finalize the development of the technical proposal

Political discussion and approval of technical proposal

Nesting implementation in 2020:

- Update of FREL
- Development of a normative tool
- Linkages with National Registry of Mitigation Initiatives

Full operation from 2021 in the Amazon

● Finished

● In design

● To be developed

Update of the National SESA and ESMF

- World Bank's ESS and inputs from the ER Program process.
- Design and development of monitoring and evaluation tools.
- Institutional arrangements.

Implementation of the SIS

NATIONAL LEVEL

ER PROGRAM LEVEL

SESA

Communication Plan

ESMF

Environmental and Social Commitment Plan (ESCP)

- Analysis of impacts and risks; identification of preliminary mitigation measures.
- Preliminary analysis of the compliance of the Program's interventions with the Bank's ESS, and the existing national legal framework.
- Stakeholder consultation, focusing on risk and measures prioritization.
- Preliminary SESA for the ER Program.
- Adjustments and improvements.

- Analysis and evaluation of the compliance of the Program's interventions with the Bank's ESS, and the existing national legal framework.
- Development of the ER Program safeguards plans, including guidelines and procedures manuals for compliance with the World Bank's ESS.
- Consultation and participation with key stakeholders.
- Institutional arrangements for safeguards implementation, monitoring and evaluation.

Update and improvement of the Stakeholder Engagement Plan

Update and improvement of the Plan for Indigenous Peoples

Benefit sharing (Ind. 33.1)

Pending issues

Type of benefits
& beneficiaries

Link to
strategy

Transversal
approaches

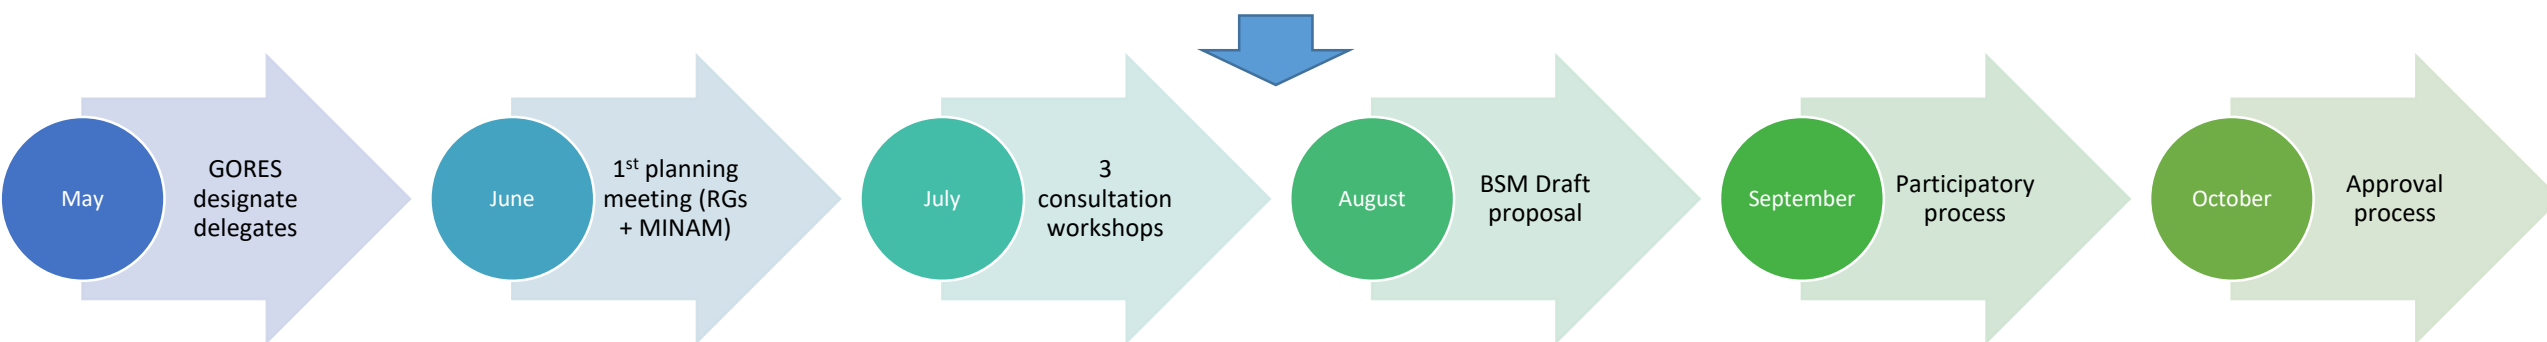

Criteria, timeline
& processes

Monitoring

Consultation
process

Legal
framework

A clear schedule has been agreed with regional governments and stakeholders. This accomplish meets the pending issue regarding consultation process

The consultation process incorporates the transversal approaches as can be seen in the way how stakeholders has been divided in the first consultation stage

1. Indigenous organizations
2. Government & Academy
3. Private sector & CSO

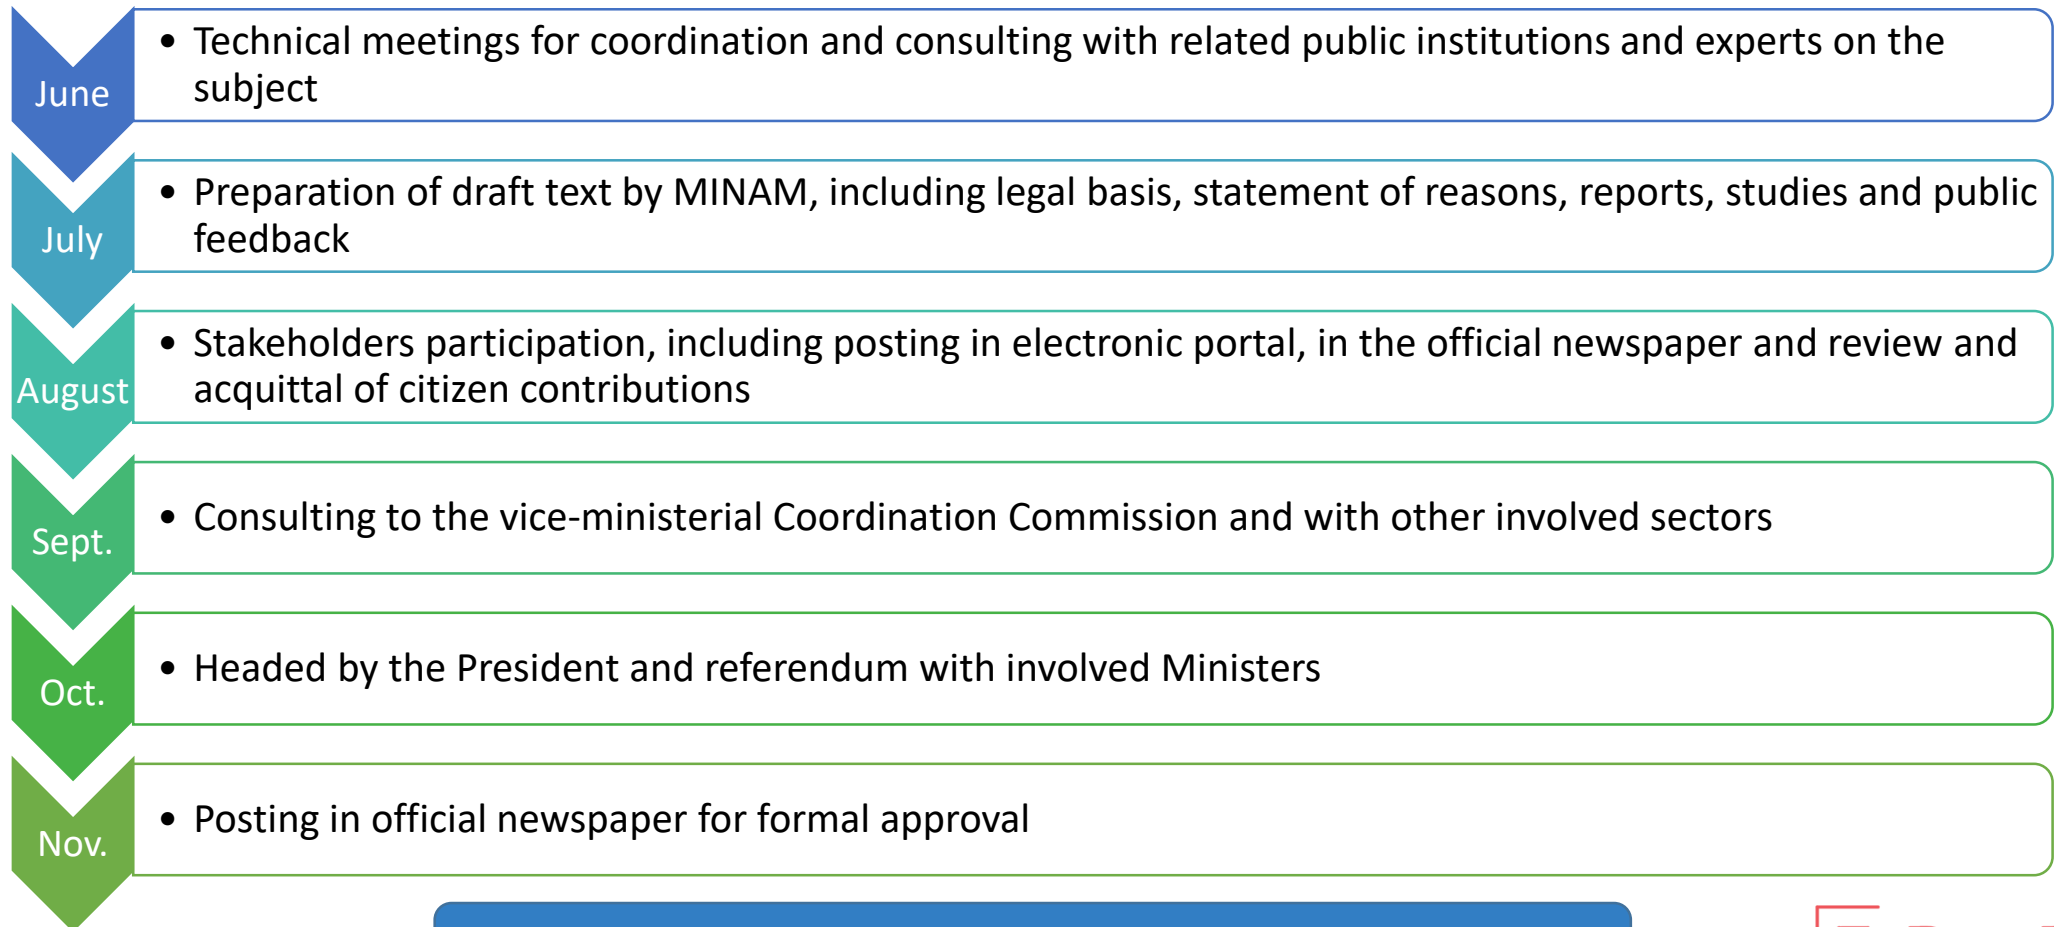

1. Legal framework
2. Beneficiaries
3. Financial administrator
4. Governance
 - a. Monitoring
5. Eligible activities (Interventions matrix)
6. Criteria of BS allocation
 - a. Stock / Flow
 - b. Scenarios
7. Procedures
8. Audits

The structure of the BSM draft proposal includes criteria, procedures, timeline, monitoring and legal framework. The framework is the intervention matrix of the PRE

Ind. 28.3, 36.1, 36.2 & 36.3 Transfer of ER

Current legal framework states that forest heritage, including environmental services, belongs to the Nation but forest holders have the right to access to their benefits. MINAM has the authority to regulate it and administer ER.

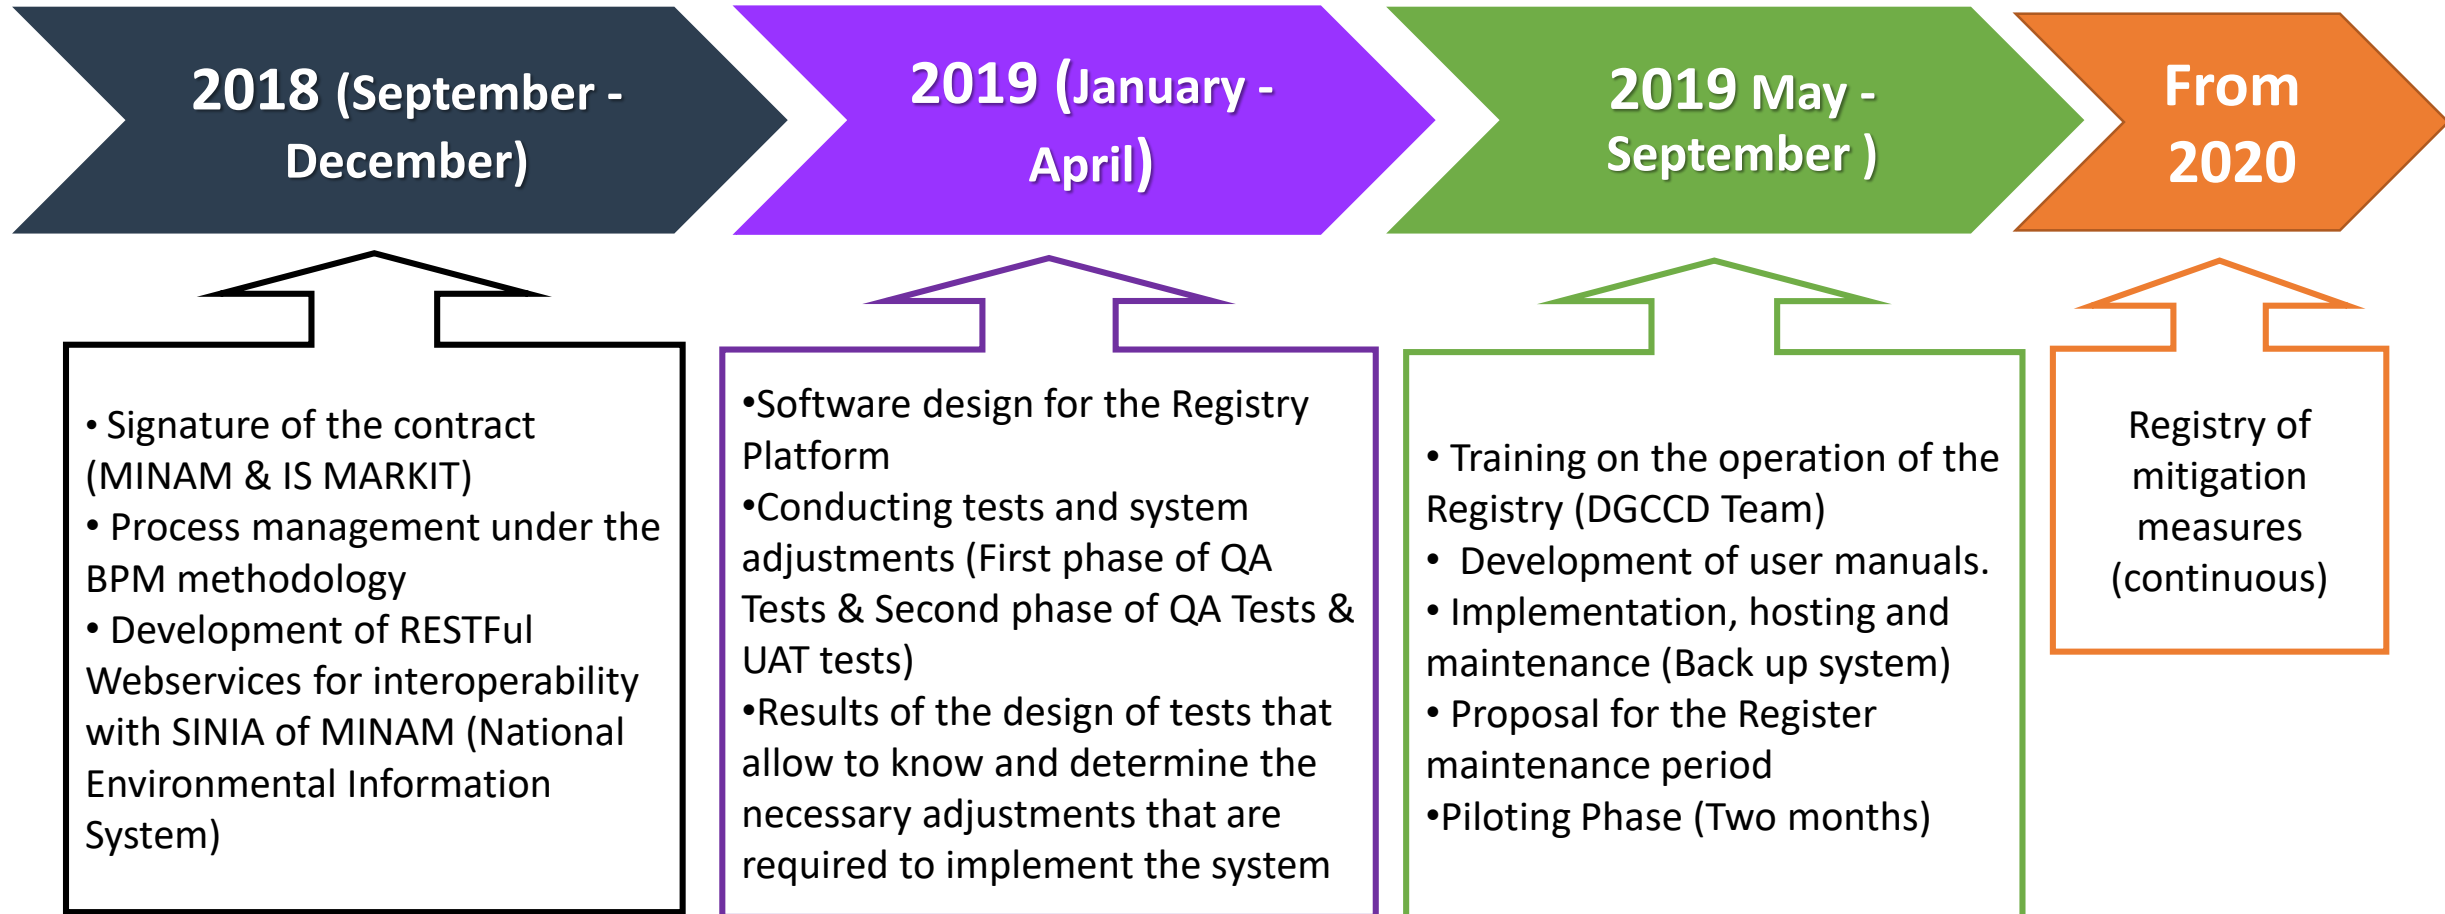

MINAM's legal power to sign ERPA and transfer ER

Additional Comments by FCPF Participants

- On Degradation:
 - The Mixed Approach is under development and involves the Indirect and Direct Methods.
 - The results obtained will be used for updating the ER Program Reference Level and for monitoring during the accounting period
 - Updates are allowed before the 1st verification event.
 - Similarly, results will be used for the updated Amazonian FREL.
 - Deforested areas previously degraded will be excluded from the degradation emissions estimation and will be accounted in the deforestation emissions.
- On Nesting:
 - Overestimated impact to ER Program emission reductions by projects. An exact estimation will be done over the updated RL.
 - Adjustments to ER volumes from the 1st monitoring period can be made as needed.

- On the development of the platform of the National Registry of Mitigation Measures:

An aerial photograph of a lush, dense tropical forest. A dark, winding river flows through the lower half of the image, surrounded by thick vegetation. The forest canopy is a vibrant green, with various shades indicating different tree species and heights. The text "Muchas Gracias" is overlaid in the center in a white, sans-serif font.

Muchas Gracias
