

Proposed structure and Process for R-package preparation in Nepal

Resham Dangi

REDD Forestry and Climate Change Cell, Nepal

**Presented at Asia-Pacific IP dialogue with the FCPF, Chiang Mai, Thailand
27th September, 2012**

Presentation Outline

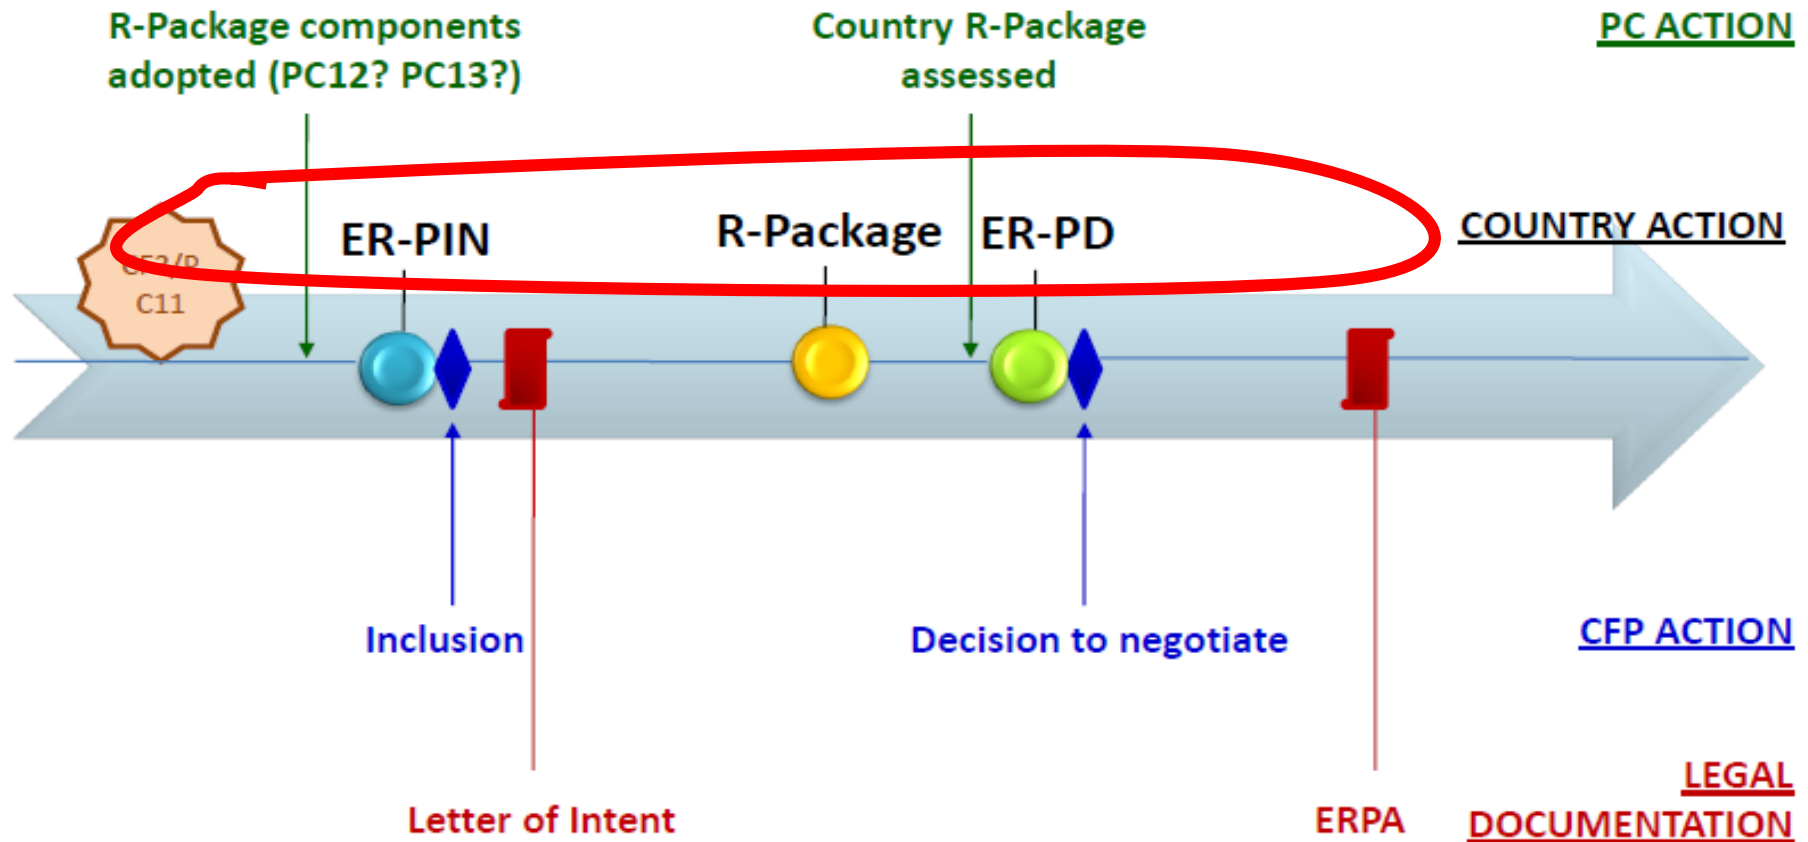

- ❖ R-package context;
- ❖ Proposed Roadmap;
- ❖ Progress update;
- ❖ Issues/ challenges and way forward;

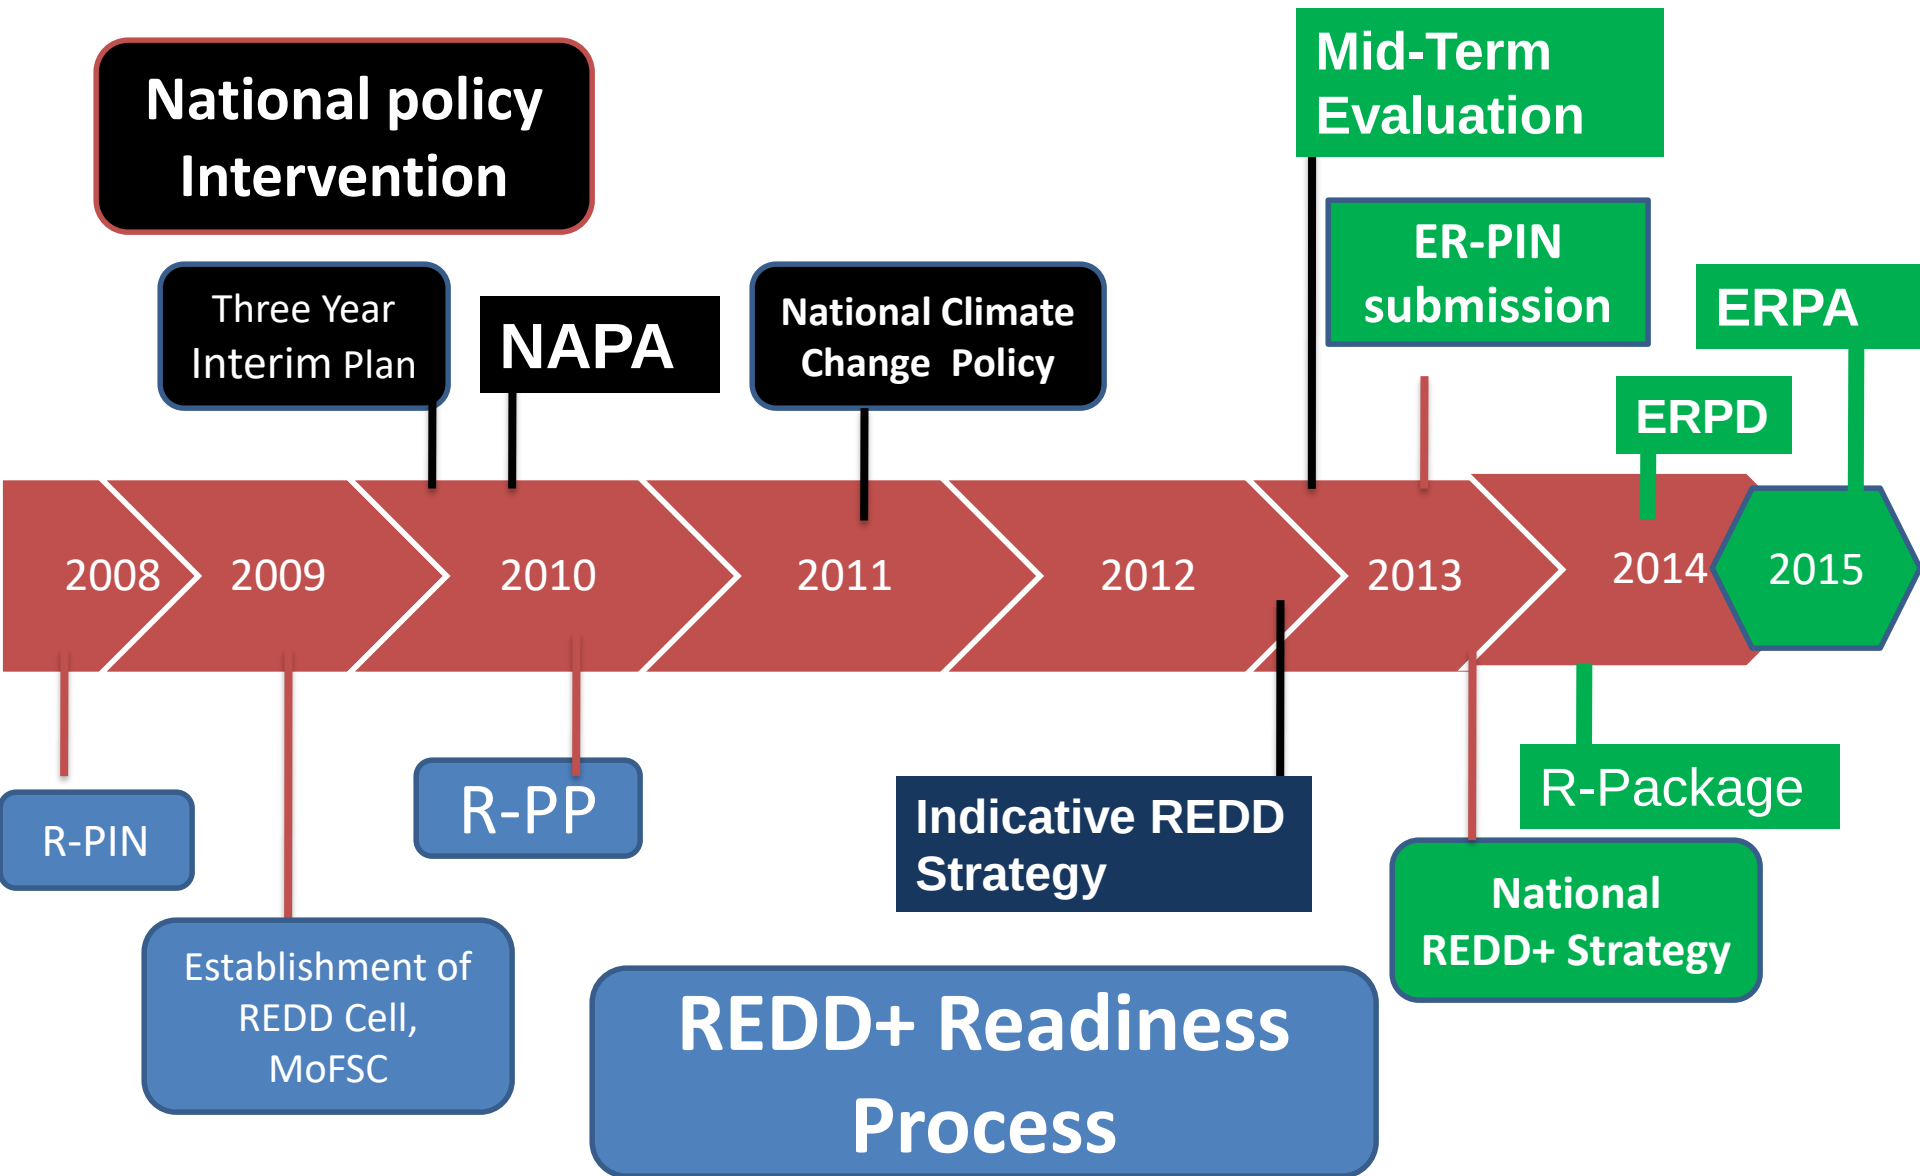

Context of R-Package in Nepal

- Take opportunity to self-assess the progress and demonstrate commitment to REDD+;
- Take advantage of receiving feed back from international experts;
- To be sure that proposed strategic actions are well safeguarded;

Landscape of R-package process

Nepal's Roadmap for Developing R-Package

Core Elements of R-Package

National REDD+ Strategy

REDD+ Implementation Framework

Reference Emission Level (REL/RL)

Monitoring, Reporting and Verification (MRV) system

Safeguards system

- Outline framework for National REDD+ Strategy is in place;
- RWG endorsed to establish Expert Technical Committee representing from GO and non-GO institutions;
- Analytical studies for Strategy formulation are in progress;
- Bilateral support (USAID , DfID, Finland and Swiss) contributing in R-PP implementation;

Core Elements of R-Package

National REDD+ Strategy

REDD+ Implementation Framework

Reference Emission Level (REL/RL)

Monitoring, Reporting and Verification (MRV) system

Safeguards system

- Nested approach with Sub-national projects within defined jurisdictions at landscape/ sub-river basin level;
- Benefit transfer from existing forestry institutions and practices for benefit and cost sharing;
- Multi-stakeholder led Carbon revenue management board will be established in center to regulate the carbon finance;

Core Elements of R-Package

National REDD+ Strategy

REDD+ Implementation
Framework

Reference Emission Level
(REL/RL)

Monitoring, Reporting and
Verification (MRV) system

Safeguards system

Progress to date

- Procurement process is in mid-way;
- Technical committee including representatives from GO and non- GO institutions established to facilitate REL development;

Core Elements of R-Package

National REDD+ Strategy

REDD+ Implementation Framework

Reference Emission Level (REL/RL)

Monitoring, Reporting and Verification (MRV) system

Safeguards system

- Consultant selection process on going;
- Technical committee including GO and non- GO members is in place to facilitate MRV development;
- Piloting is on going to develop local forest monitoring systems at watershed and landscape level;

Core Elements of R-Package

National REDD+ Strategy

REDD+ Implementation Framework

Reference Emission Level (REL/RL)

Monitoring, Reporting and Verification (MRV) system

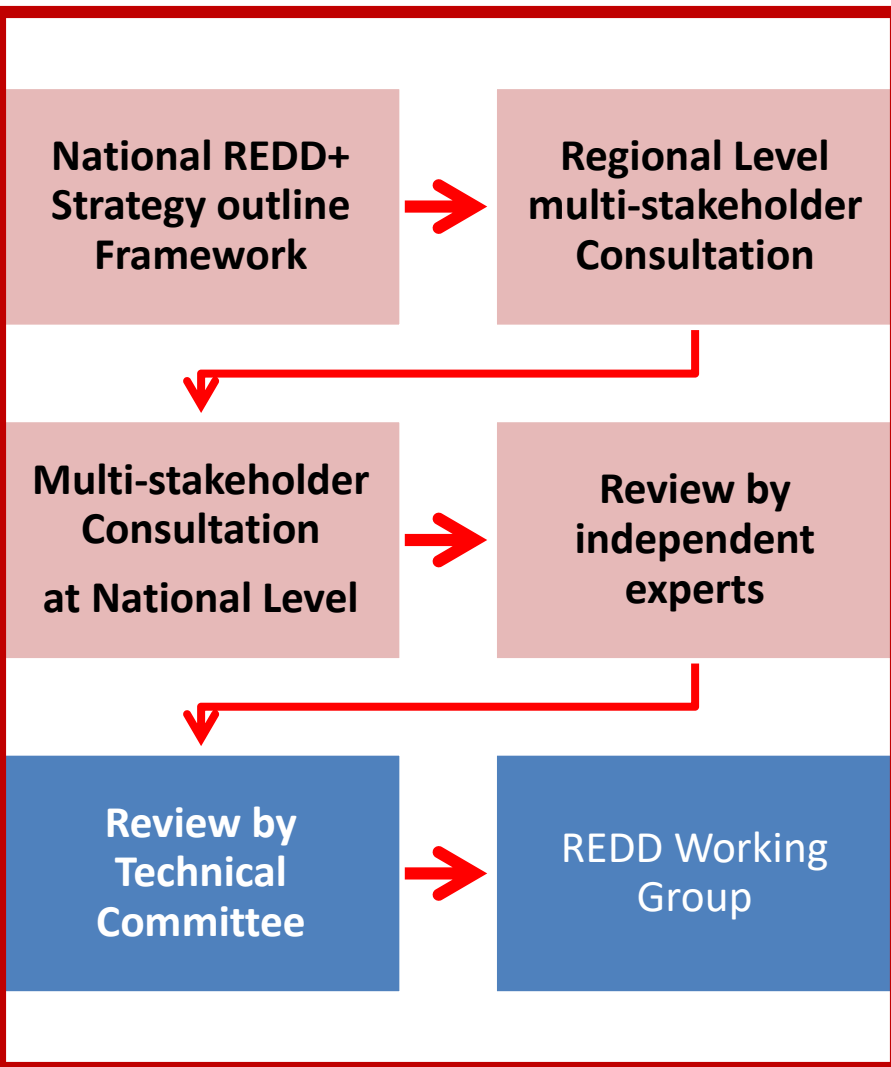

Safeguards system

Progress to date

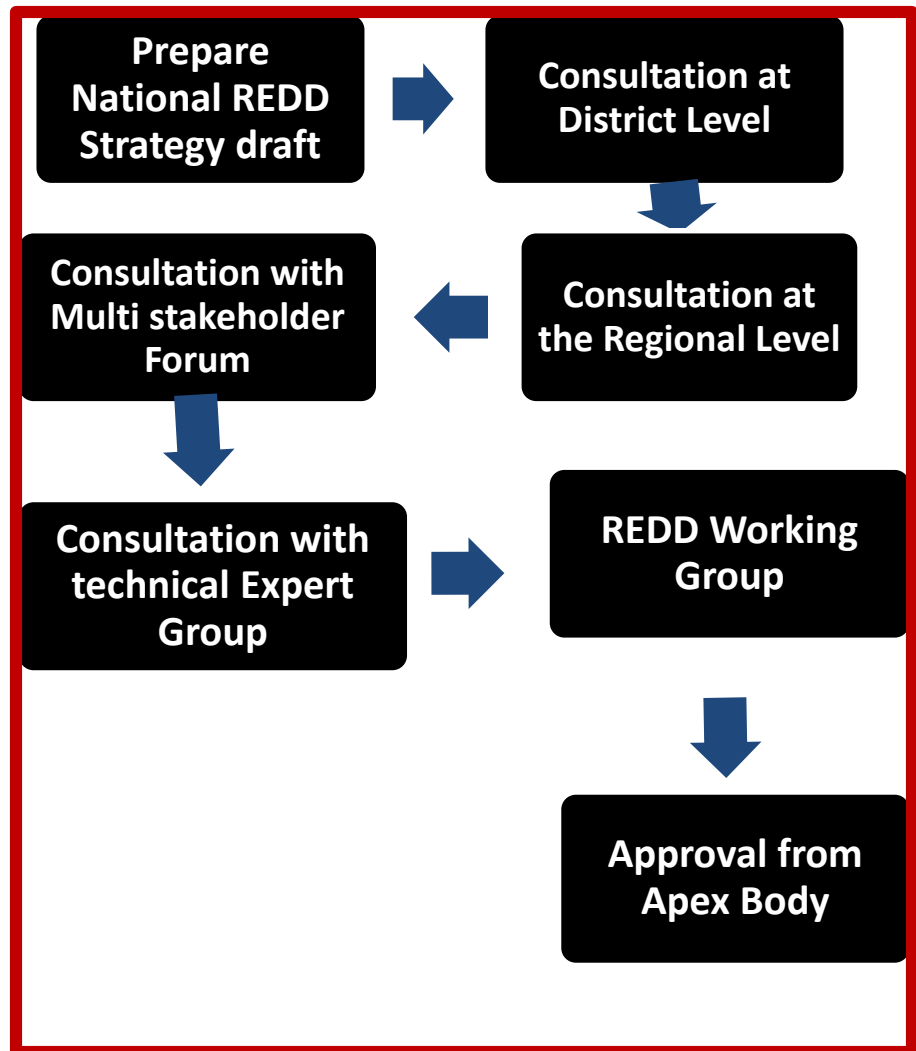

- Consultant selection for SESA is in progress;
- Interim Indicative strategy options will be proposed to address drivers of D/D , until final strategy is in place ;
- REDD+ SES indicators is in final stage through multi-stakeholder led process.

Multi-stakeholder process is time taking.....
