17 June 2021  
2,5 hours

Co-organized by The World Bank, Kinome, and Alisos

# Knowledge Activities - MRV

POLICY BRIEF May 2021

## Lessons Learned from the Implementation of MRV Systems for REDD+

- Significant technical and financial support has been provided in the last 10 years to help REDD+ countries develop National Forest Monitoring Systems (NFMS) for the purpose of REDD+ Measurement, Reporting and Verification (MRV)
- Lessons have been learned in this period on common obstacles and successes
- These lessons learned resulted in recommendations to help guide the delivery of support to countries for REDD+ MRV and National Forest Monitoring Systems by donors and technical partners

### Open-source resources for Forest Measurement, Reporting and Verification (MRV)

**OpenMRV** is a knowledge platform that delivers resources to support countries and other users to operationalize their forest MRV processes.

### Lessons learned (4)

- External technical support is required
- Exchange of experience

ya que usted no conoce todo y necesita aprender de otros que lo hacen mejor. Es muy importante encontrar a los mejores en cada

## Designing Benefit Sharing Arrangements:

### A Resource for Countries

This platform provides a comprehensive set of tools, resources and case studies for the design and implementation of benefit sharing arrangements for emission reductions programs, as well as other results-based land use initiatives. The different sections of this platform are designed to break down the complex concept of benefit sharing into distinct steps to enable a logical approach to developing arrangements that help achieve program objectives and promote equity and efficiency.

This resource was created by the World Bank's Forest Carbon Partnership Facility and BioCarbon Fund Initiative for Sustainable Forest Landscapes.
